Here's my write up for last week:

Response

**Hood Mercury Response – Odessa, TX:** The Ector County Independent School District (ECISD) contractors worked 24 hour work cycles to complete the assessment of elemental mercury released inside Hood Junior High School. By the end of the week all areas of the school had been assessed by way of activity based sampling. Approximately 30% of the school's floors had mercury levels requiring remediation. The 8 Hour NIOSH air sampling will start inside the impacted and remediated rooms beginning Monday March 31<sup>st</sup>.
